The Capacity to Endure

At the heart of all our processes is the desire to enhance the long-term well-being of staff, customers and the environment. It is natural, therefore, that we take a holistic approach to sustainability. Such an approach extends from our local community, to the environment, product installation and product re-use.

We actively support and promote local businesses & community projects, ensuring we make a positive impact regardless of our size internationally. It is this belief that has enabled a cluster of like-minded and supporting businesses to operate in our region.

We have introduced a range of products that are 99% recyclable and contain large amounts of post consumer material. Our design process demands product longevity & modularity as inherent attributes thereby allowing the useful life of the product to be extended well beyond that of similar products.

POST CONSUMER MATERIAL

As part of our commitment to the environment we have a range of products that contain large amounts of post consumer material. In some cases up to 84%.

Post-consumer material is an end product that has completed its life cycle as a consumer item and would otherwise have been disposed of as a solid waste. Post-consumer materials include recyclables collected in commercial and residential recycling programs, such as office paper, cardboard, aluminium cans, plastics and metals (Source: MeetGreen.com).

Post consumer and recycled products are not inferior in quality, in fact we can still maintain our industry leading 12kg's (26.5lbs) capacity per arm on most of our products.

LEED POINTS

The US Green Building Council has developed the Leadership in Energy and Environmental Design (LEED) Green Building Rating System. Integ products can assist with points in the following categories for commercial interiors and new construction.

- Material & resources
- Innovation & design

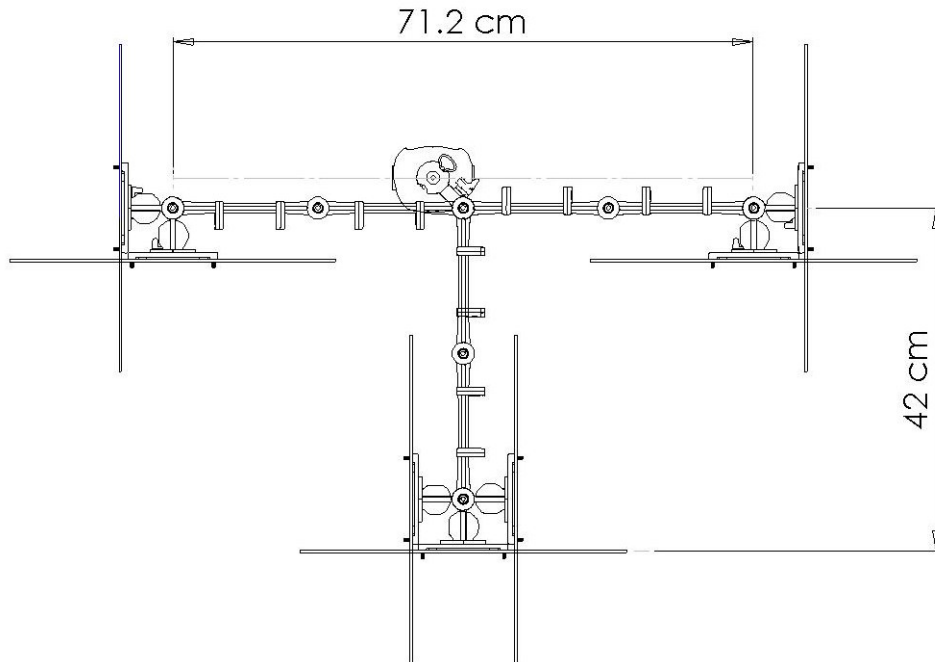

GREENSTAR AUSTRALIA

With a number of products that deliver a full range of adjustment reducing discomfort of glare, Integ can add a valuable point to your Greenstar rating.

ADDITIONAL GUIDANCE (IEQ-4, NO. 18)

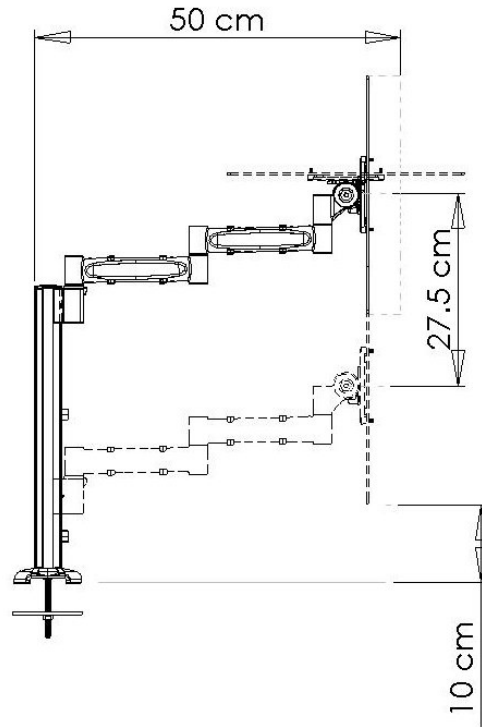

Adjustable arms must have at least two articulations and be able to provide the monitor with a vertical and horizontal displacement, and be positioned at any point within this displacement, as follows:

- The horizontal displacement must be at least 50cm total measured from either horizontal extremity measured from the centre point of where the monitor arm is designed to attach to the monitor; and

Shown with Apollo4, Mercury 2-Limb Arm and split clamp

- The vertical displacement must be at least 18cm total measured as though there is a 19" monitor arm attached.

Shown with Apollo4, Mercury 2-Limb Arm and split clamp

Therefore, there must be at least a 10cm clearance between the surface of the table/desk and the centre of the monitor arm. The displacement itself is then measured upwards from the centre of the arm.

GREENSTAR REQUIREMENT	APOLLO1	APOLLO2	APOLLO4	APOLLO4P+	APOLLO6
Two points of Articulation	✓	✓	✓	✓	✓
Vertical displacement 18cm mm or greater	✓	✓	✓	✓	✓
Horizontal displacement 50 cm or greater	✓	✓	✓	✓	✓
Vertical and horizontal pivot	✓	✓	✓	✓	✓
Provide perpendicular to the two nearest facades	✓	✓	✓	✓	✓

Minimising our Impact

Integ have made a serious commitment to reduce the impact of our products. All our products are 99% recyclable and contain large amounts of post consumer material. Within our manufacturing facilities we also use pre-consumer recycled materials.

Specific developments include:

- **Removed** the need for
 - Gas struts
 - PVC
 - Trivalent Chromium (Cr III) or Hexavalent Chromium (Cr VI) in our pre-treatment process
- **Reduced** the number of parts in all our units
 - With a modular design our products are easy to disassemble and re-configure
- **Reduced** packing requirements
- **Re-used** consumer material where possible. Our standard limb and split clamp are made of **100% post consumer aluminium or Steel** as per ISRI specifications
- **Extended warranty**
 - Our warranty is a **massive 10 years**, reducing the need to the replace the product and reducing total lifetime value.

POST CONSUMER MATERIAL

	APOLLO1	APOLLO2	APOLLO4	APOLLO6
Percentage of post consumer material	95%	84%	60%	30%
Percentage Recyclable	99%	99%	99%	99%

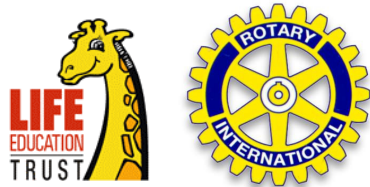

Measured by weight for a 2-limb arm with split clamp (where required)

About Integ

Integ is a manufacturer and designer of modular monitor arms and office accessories. Proudly made in New Zealand by Modtec Industries, our difference lies in our range of modular components, which come together to deliver unique mounting solutions. This Lego® styled approach drives our design philosophy from idea to product installation.
